Comment:

- a. The information on the occupation of ST.VALENTIN, NLUSIEDL A SET and KITTSEE as of early August 1949 does not indicate any change, if compared with previous reports.
- b. Two hundred to three hundred engineer troops (possibly component units of the 177th Ener Bn/95th Eds wtz Rifle Liv) and been located in ELE on the Lanube River up to late July 1949. Their departure (probably for the DOESERSHELD troop training rounds) was observed at that time. The observation of 11 August 1949 indicates that recruits probably remained at the post.
- c. Most of the troops of the unit station of in BAD rISCHAU left for maneuvers in mid-June 1949.
- d. The small guard detail in MALNBULG (referred to as rear cetail in Lay 1949) was confirmed.
